¿Por qué ExecuTrain?

ExecuTrain es un proveedor de entrenamiento corporativo a nivel internacional y líder mundial en la capacitación empresarial. Contamos con 22 años y más de 62 mil personas capacitadas en zona occidente.

¿Por qué ExecuTrain?

Te guiamos en la definición de tus requerimientos de capacitación, en las diferentes etapas:

- Detección de necesidades, evaluación de conocimientos, plan de capacitación y seguimiento posterior para elegir el plan de capacitación como tú lo necesitas.
- El más amplio catálogo de cursos, desde un nivel básico hasta los niveles de conocimientos más especializados.
- En ExecuTrain el material y la metodología están diseñados por expertos en aprendizaje humano. Lo que te garantiza un mejor conocimiento en menor tiempo.
- Tú puedes confiar y estar seguro del aprendizaje porque nuestro staff de instructores es de primer nivel, algunos de los cuales son consultores en reconocidas empresas.
- No pierdas tu tiempo, los cursos están diseñados para un aprendizaje práctico.
- Nuestra garantía: Nuestro compromiso es que tú aprendas, si no quedas satisfecho con los resultados del programa, podrás volver a tomar los cursos hasta tu entera satisfacción o la devolución de tu dinero.

Modalidad de servicio

- Cursos de Calendario
- Cursos Privados: On site y en nuestras instalaciones.
- Cursos Personalizados: Adaptamos el contenido del curso y su duración dependiendo de la necesidad del cliente.
- E-Training: cursos a distancia de forma interactiva, mejorando la capacidad de aprendizaje de nuestros participantes guiados por un instructor en vivo.

Duración: 2 días

SC-400 / Microsoft Information Protection Administrator

Learn how to protect information in your Microsoft 365 deployment. This course focuses on data governance and information protection within your organization. The course covers implementation of data loss prevention policies, sensitive information types, sensitivity labels, data retention policies and Office 365 message encryption among other related topics. The course helps learners prepare for the Microsoft Information Protection Administrator exam (SC-400).

> Audience Profile

The Information Protection Administrator plans and implements controls that meet organizational compliance needs. This person is responsible for translating requirements and compliance controls into technical implementation. They assist organizational control owners to become and stay compliant. They work with information technology (IT) personnel, business application owners, human resources, and legal stakeholders to implement technology that supports policies and controls necessary to sufficiently address regulatory requirements for their organization. They also work with the compliance and security leadership such as a Chief Compliance Officer and Security Officer to evaluate the full breadth of associated enterprise risk and partner to develop those policies. This person defines applicable requirements and tests IT processes and operations against those policies and controls. They are responsible for creating policies and rules for content classification, data loss prevention, governance, and protection.

> Prerequisites

- Foundational knowledge of Microsoft security and compliance technologies.
- Basic knowledge of information protection concepts.
- Understanding of cloud computing concepts.
- Understanding of Microsoft 365 products and services.

> Skills Gained

- Explain and use sensitivity labels.
- Configure Data Loss Prevention policies.
- Secure messages in Office 365.
- Describe the information governance configuration process.
- Define key terms associated with Microsoft's information protection and governance solutions.
- Explain the Content explorer and Activity explorer.
- Describe how to use sensitive information types and trainable classifiers.
- Review and analyze DLP reports.
- Identify and mitigate DLP policy violations.
- Describe the integration of DLP with Microsoft Cloud App Security (MCAS).
- Deploy Endpoint DLP
- Describe records management
- Configure event driven retention
- Import a file plan
- Configure retention policies and labels
- Create custom keyword dictionaries

> Modulos

Module 1: Implement Information Protection in Microsoft 365

Organizations require information protection solutions to protect their data against theft and accidental loss. Learn how to protect your sensitive information. Learn how Microsoft 365 information protection and governance solutions help you protect and govern your data, throughout its lifecycle – wherever it lives, or wherever it travels. Learn about the information available to help you understand your data landscape and know your data. Learn how to use sensitive information types to support your information protection strategy. Learn about how sensitivity labels are used to classify and protect business data while making sure that user productivity and their ability to collaborate are not hindered.

Lessons

- Introduction to information protection and governance in Microsoft 365
- Classify data for protection and governance
- Create and manage sensitive information types
- Describe Microsoft 365 encryption
- Deploy message encryption in Office 365
- Configure sensitivity labels
- Apply and manage sensitivity labels
- Lab : Implement Information Protection
- Assign permissions for compliance
- Manage Office 365 message encryption
- Manage Sensitive Information Types
- Manage Trainable Classifiers
- Manage Sensitivity Labels

After completing this module, students will be able to:

- Describe Microsoft's approach to information protection and governance.
- List the components of the Data Classification solution.
- Describe how to use sensitive information types and trainable classifiers.
- Implement document fingerprinting
- Create custom keyword dictionaries
- Deploy message encryption in Office 365

Module 2: Implement Data Loss Prevention in Microsoft 365

In this module we discuss how to implement data loss prevention techniques to secure your Microsoft 365 data. Learn how to discover, classify, and protect sensitive and business-critical content throughout its lifecycle across your organization. Learn how to configure and implement data loss prevention policies and integrate them with Microsoft Cloud App Security. Learn how to respond to and mitigate data loss policy violations.

Lessons

- Prevent Data loss in Microsoft 365
- Implement Endpoint data loss prevention
- Configure DLP policies for Microsoft Cloud App Security and Power Platform
- Manage DLP policies and reports in Microsoft 365
- Lab : Implement Data Loss Prevention
- Manage DLP policies
- Mange Endpoint DLP
- Test DLP policies
- Mange DLP reports

After completing this module, students will be able to:

- Describe the information protection configuration process.
- Articulate deployment and adoption best practices.
- Describe the integration of DLP with Microsoft Cloud App Security (MCAS).
- Configure policies in Microsoft Cloud App Security.
- Review and analyze DLP reports.
- Identify and mitigate DLP policy violations.
- Mitigate DLP violations in MCAS.

Module 3: Implement Information Governance in Microsoft 365

In this module you will learn how to plan and implement information governance strategies for an organization. Learn how to manage your content lifecycle using solutions to import, store, and classify business-critical data so you can keep what you need and delete what you don't. Learn how to manage retention for Microsoft 365, and how retention solutions are implemented in the individual Microsoft 365 services. Learn how to use

intelligent classification to automate and simplify the retention schedule for regulatory, legal, and business-critical records in your organization.

Lessons

- Govern information in Microsoft 365
- Manage data retention in Microsoft 365 workloads
- Manage records in Microsoft 365
- Lab : Implement Information Governance
- Configure Retention Labels
- Implement Retention Labels
- Configure Service-based Retention
- Use eDiscovery for Recovery
- Configure Records Management

After completing this module, students will be able to:

- Describe the information governance configuration process.
- Articulate deployment and adoption best practices.
- Describe the retention features in Microsoft 365 workloads.
- Configure retention settings in Microsoft Teams and SharePoint Online.
- Implement retention for Exchange Mailbox items.
- Recover content protected by retention settings.
- Regain protected items from Exchange Mailboxes.
- Describe the records management configuration process.
