¿Por qué ExecuTrain?

ExecuTrain es un proveedor de entrenamiento corporativo a nivel internacional y líder mundial en la capacitación empresarial. Contamos con 22 años y más de 62 mil personas capacitadas en zona occidente.

¿Por qué ExecuTrain?

Te guiamos en la definición de tus requerimientos de capacitación, en las diferentes etapas:

- Detección de necesidades, evaluación de conocimientos, plan de capacitación y seguimiento posterior para elegir el plan de capacitación como tú lo necesitas.
- El más amplio catálogo de cursos, desde un nivel básico hasta los niveles de conocimientos más especializados.
- En ExecuTrain el material y la metodología están diseñados por expertos en aprendizaje humano. Lo que te garantiza un mejor conocimiento en menor tiempo.
- Tú puedes confiar y estar seguro del aprendizaje porque nuestro staff de instructores es de primer nivel, algunos de los cuales son consultores en reconocidas empresas.
- No pierdas tu tiempo, los cursos están diseñados para un aprendizaje práctico.
- Nuestra garantía: Nuestro compromiso es que tú aprendas, si no quedas satisfecho con los resultados del programa, podrás volver a tomar los cursos hasta tu entera satisfacción o la devolución de tu dinero.

Modalidad de servicio

- Cursos de Calendario
- Cursos Privados: On site y en nuestras instalaciones.
- Cursos Personalizados: Adaptamos el contenido del curso y su duración dependiendo de la necesidad del cliente.
- E-Training: cursos a distancia de forma interactiva, mejorando la capacidad de aprendizaje de nuestros participantes guiados por un instructor en vivo.

Duración: 35 horas

Curso MB-200 / Microsoft Power Platform + Dynamics 365 Core

The Microsoft Power Platform helps organizations optimize their operations by automating routine tasks and standardizing best practices. This training provides a high-level overview of the capabilities of Microsoft Dynamics 365 and the Power Platform and provides a foundation for other Microsoft Dynamics 365 and Power Platform training offerings. High-level topics include application configuration, automation opportunities, integration, testing, and deployment.

> Objetivos

After completing this course, you will be able to:

- Identify platform components.
- Understand administrator options.
- Effectively model data.
- Build a basic model-driven or canvas application.
- Identify testing strategies and methodologies.

> Audiencia

A Dynamics 365 Customer Engagement Functional Consultant is responsible for performing discovery, capturing requirements, engaging subject matter experts and stakeholders, translating requirements, and configuring the solution and applications. The Functional Consultant implements a solution using out of the box capabilities, codeless extensibility, application and service integrations.

> Esquema del curso

• **Module 1: Power Platform overview**

In this module, you will learn the basics of the Power Platform. You will tour the various administrator portals and install applications.

- Lessons
 - Overview
 - Configure Power Platform environments
 - Creating applications
 - Discovery and planning.
- After completing this module you will be able to:
 - Identify common platform components and their uses.

• **Module 2: Data Modeling**

In this module you will learn how to model data effectively using the platform's entities, attributes and relationships.

- Lessons
 - Data model fundamentals
 - Relationships
 - Other entity options
 - Other field options
 - Internationalizing
- After completing this module you will be able to:
 - Create and use relationships and entities.

• **Module 3: Model-driven apps**

In this module you will learn about model driven applications and how to configure and use them.

- Lessons
 - Configure model-driven apps
 - Configure model-driven forms
 - Configure views
 - Configure model-driven charts
 - Configure model-driven dashboards
 - Configure reports
- After completing this module you will be able to:
 - Create and modify forms.
 - Create and modify views and dashboards.
 - Identify and use other user experience components.

• **Module 4: Canvas apps**

In this module you will learn how to create and use canvas apps, as well as learn the differences between canvas apps and model-driven.

- Lessons
 - Application fundamentals
 - Working with data and services
 - Customizing the user experience
 - Integration with model-driven apps
- After completing this module you will be able to:
 - Create a canvas app.
 - Work with CDS data.

• **Module 5: Security**

In this module you will learn how the platform's security model manages users' experiences and access to both data and functionality.

- Lessons
 - Security overview
 - Business units
 - Manage security roles
 - Manage teams
 - Configure hierarchy security
- After completing this module you will be able to:
 - Create and use business units.
 - Create, modify and use security roles.

• **Module 6: Platform Automation Overview**

In this module you will learn the basics of the Power Platform automation capabilities.

- Lessons
 - Automation overview
- After completing this module you will be able to:
 - Identify common platform automation capabilities.

• **Module 7: Business Rules**

In this module you will learn how to build and use business rules and how they work alongside other platform automations.

- Lessons
 - Introduction to business rules
 - Additional business rule details
- After completing this module you will be able to:
 - Create and use business rules.

• **Module 8: Workflows**

In this module you will learn how to build and use workflows and how they work alongside other platform automations.

- Lessons
 - Introduction to workflows
 - Building workflows
 - Advanced workflows
- After completing this module you will be able to:
 - Create and use workflows.

• **Module 9: Microsoft Flows**

In this module you will learn how to build and use Microsoft Flows and how they work alongside other platform automations.

- Lessons
 - Introduction to Microsoft Flow
 - Other Flow concepts
 - Working with CDS
 - Building approval flows
 - Starting from apps
 - Flow deployment considerations
- After completing this module you will be able to:
 - Create and use Microsoft Flows.

- **Module 10: Business Process Flows**

In this module you will learn how to build and use business process flows and how they work alongside other platform automations.

- Lessons
 - Introduction to business process flows
 - Configure business process flows
 - Additional business process flow details
- After completing this module you will be able to:
 - Create and use business process flows.

- **Module 11: Introduction to integrations**

In this module you will learn the basics of the Power Platform integration capabilities. You will learn how to configure and use email integrations.

- Lessons
 - Overview of common scenarios
 - Email integration
 - Outlook integration
- After completing this module you will be able to:
 - Identify common integrations,
 - Configure and use email integrations.

- **Module 12: Integration with Office**

In this module you will learn how to integrate with common Office products like OneNote, Word and Excel.

- Lessons
 - Templates
 - SharePoint
 - Microsoft Teams
 - Additional integrations
- After completing this module you will be able to:
 - Configure and use integrations with Office products.

- **Module 13: Managing Data**

In this module you will learn how to import and export data for the Power Platform and create and use data maps.

- Lessons
 - Managing data overview
 - Duplicate detection
 - Importing data
 - Exporting data
 - Bulk delete
- After completing this module you will be able to:
 - Import and export data.
 - Create and use data maps.
 - Perform bulk delete.

- **Module 14: Manage Instances and Applications**

In this module you will learn how to enable and update first-party applications; install third-party apps and configure using admin portals.

- Lessons
 - Overview
 - Manage applications
- After completing this module you will be able to:
 - Enable and update first-party apps.
 - Install third-party apps.

- **Module 15: Manage Solutions**

In this module you will learn how to create, manage and deploy solutions.

- Lessons
 - Solution concepts
 - Planning and creating solutions
 - Working with solution components
 - Distributing solutions
 - Working with managed solutions
- After completing this module you will be able to:
 - Create solutions.
 - Deploy customizations.

- **Module 16: Additional Deployment**

Considerations

In this module you will learn how to configure for mobile and deploy components such as Microsoft Flow.

- Lessons
 - Configure settings
 - Mobile configuration settings
 - Mobile configuration
- After completing this module you will be able to:
 - Configure for mobile.
 - Deploy components.
