¿Por qué ExecuTrain?

ExecuTrain es un proveedor de entrenamiento corporativo a nivel internacional y líder mundial en la capacitación empresarial. Contamos con más de 30 años de Experiencia y con más de 75 mil personas capacitadas a nivel Nacional.

Te guiamos en la definición de tus requerimientos de capacitación, en las diferentes etapas:

- ✓ Detección de necesidades, evaluación de conocimientos, plan de capacitación y seguimiento posterior para elegir el plan de capacitación como tú lo necesitas.
- ✓ El **más amplio catálogo de cursos**, desde un nivel básico hasta los niveles de conocimientos más especializados.
- ✓ En ExecuTrain el material y la **metodología están diseñados por expertos en aprendizaje humano**. Lo que te garantiza un mejor conocimiento en menor tiempo.
- ✓ Tú puedes confiar y estar seguro del aprendizaje porque nuestro **staff de instructores es de primer nivel**, algunos de los cuales son consultores en reconocidas empresas.
- ✓ No pierdas tu tiempo, los cursos están diseñados para un aprendizaje práctico.

Nuestro compromiso es que tú aprendas, si no quedas satisfecho con los resultados del programa, podrás volver a tomar los cursos hasta tu entera satisfacción o la devolución de tu dinero.

Modalidad de Servicio

Cursos en Fecha Calendario

Súmate a nuestros grupos en fechas públicas.

Cursos Privados

On site, en nuestras instalaciones o en línea con instructor en vivo.

Autoestudio con soporte de instructor

Cursos en modalidad autoestudio, con acceso 24/7 a la plataforma de estudio, con soporte de instructor y foros de ayuda

55345 / Implementing and Managing Windows 11

Course 55345AC is the Community Courseware equivalent of retired MOC Course 20697-1D - Implementing and Managing Windows 10.

This is 28 hours course designed to provide you with the knowledge and skills required to install and configure Windows 11 desktops and devices in an on-premises Windows Server Active Directory domain environment. The skills you gain by attending this course include:

- Learning how to install and customize Windows 11 operating systems and apps
- Configuring local and remote network connectivity and storage.

You'll also learn how to:

- Configure data security, device security, and network security
- Maintain, update, and recover Windows 11.

Note: This course is also backwards compatible with Windows 10 as many of the technologies and principles remain the same.

👥 Perfil del Público

This course is aimed at IT professionals who support Windows 11 desktops, devices, users, and associated network and security resources. The secondary audience for this course is Desktop/Device Support Technicians (DSTs) who provide Tier 2 support to users with computers that are running the Windows 11 operating system (OS) in a on-premises environment.

🕐 Al Finalizar el Curso

Install and configure Windows 11 desktops and devices in a Windows Server domain corporate environment. The skills you will gain in this course include learning how to install and customize Windows 11 operating systems and apps, and configure local and remote network connectivity and storage. You will also learn how to configure data security, device security, network security, and maintain, update, and recover Windows 11.

✔ Requisitos Previos

Antes de asistir a este curso, los estudiantes deben tener:

- ✓ Experience installing PC hardware and devices.
- ✓ Basic Windows and Active Directory knowledge.
- ✓ Knowledge of networking fundamentals.
- ✓ Knowledge of Microsoft Active Directory Domain Services (AD DS) principles and fundamentals of AD DS management
- ✓ Fundamental understanding of Windows Server.
- ✓ Understanding of Microsoft Windows Client essentials; for example, working knowledge of Windows 10 or Windows 11
- ✓ Basic understanding of Windows PowerShell syntax

📋 Módulos

Module 1: Installing Windows 11

This module describes the new features of Windows 11. The module also lists the hardware requirements for Windows 11, and describes the interactive installation process. The module then goes on to explain the various deployment options that could also be used in larger networks. The module also includes a review of the new user interface.

Lessons

- Introducing Windows 11
- Installing Windows 11

Lab 1: Introducing Windows 11 Installing Windows 11

- Performing a Windows 11 installation
- Navigating the Windows 11 user interface

After completing this module, students will be able to:

- Describe Windows 11 features
- Choose an appropriate Windows 11 edition
- Navigate the user interface

- Describe installation and deployment options

Module 2: Upgrading and updating Windows 11

This module describes the various upgrade and migration options available for installers. It also discusses how to migrate user state following an upgrade or migration. In the second half of the module, students learn how to manage Windows 11 updates.

Lessons

- Upgrading to Windows 11
- Migrating user state
- Managing Windows 11 updates

Lab 1: Upgrading and updating Windows 11

- Performing an upgrade from Windows 10
- Migrating user state from Windows 10
- Configuring and managing Windows 11 updates

After completing this module, students will be able to:

- Compare upgrade and migration
- Migrate user state
- Manage Windows 11 updates

Module 3: Configuring Windows 11 devices

This module explains how to complete typical post-installation configuration options for Windows 11. Students also learn how to use both the Settings app and Control Panel to complete typical installation tasks.

Lessons

- Local configuration tools in Windows 11
- Using Windows Admin Center
- Using Windows PowerShell
- Implementing Remote Management

Lab 1: Configuring Windows 11 devices

- Configuring Windows 11 devices with Windows Admin Center
- Configuring Windows 11 devices with Windows PowerShell

After completing this module, students will be able to:

- Select the appropriate configuration tool
- Perform common configuration tasks
- Implement remote management

Module 4: Configuring network connectivity

This module provides guidance on configuring network settings, including how to set up and manage a VPN.

Lessons

- Configuring network connectivity
- Implementing name resolution
- Implementing remote access

Lab 1: Configuring network connectivity

- Configuring IPv4 settings
- Configuring and testing name resolution
- Configuring a VPN

After completing this module, students will be able to:

- Configure network settings
- Implement name resolution
- Describe remote access options

Module 5: Managing storage

This module describes a typical disk configuration for a Windows 11 computer. The module then provides guidance on how to manage both local storage, and how to configure access to remote storage, such as OneDrive. Students also learn how to enable and configure Storage Spaces.

Lessons

- Overview of storage options
- Managing local storage
- Managing Storage Spaces

Lab 1: Managing storage

- Managing a simple volume
- Creating s storage space

After completing this module, students will be able to:

- Describe typical storage configurations
- Manage disks, volumes, and partitions
- Manage storage spaces

Module 6: Managing resources

This module provides an overview of supported file systems, and explains use-case scenarios for each. Students then learn how to configure and manage access to shared files, how to implement file synchronization using Work Folders, and how to manage printer access.

Lessons

- Configuring and managing file access
- Configuring and managing shared folders
- Implementing Work Folders
- Managing printers

Lab 1: Managing resources

- Creating, managing, and sharing folder
- Implementing Work Folders
- Managing printers

After completing this module, students will be able to:

- Manage file access
- Manage shared folders
- Implement Work Folders
- Manage printers

Module 7: Managing apps in Windows 11

This module describes how to deploy apps to Windows 11 devices. Students also learn how to troubleshoot apps. Finally, the module also discusses how to configure Microsoft Edge browser settings.

Lessons

- Deploying apps
- Managing access to the Microsoft Store
- Configuring Microsoft Edge

Lab 1: Managing apps

- Restricting access to the Microsoft Store
- Configuring Microsoft Edge
- Enabling Application Guard

After completing this module, students will be able to:

- Choose how to deploy apps to user devices
- Configure access to the Microsoft Store
- Configure Microsoft Edge settings

Module 8: Implementing and managing security

This module outlines common security threats and available mitigations. Students then learn to configure user and group accounts and User Account Control (UAC) settings. The module also discusses data security issues, and then provides a description of available technologies that can help mitigate those threats, including Credential Guard, Exploit Guard, and BitLocker.

Finally, the module explores ways that students can help secure network traffic.

Lessons

- Managing user and group accounts
- Configuring User Account Control
- Implementing BitLocker
- Implementing Windows 11 security features
- Securing against network threats

Lab 1: Implementing and managing security

- Configuring local security policy settings
- Implementing BitLocker
- Configuring Windows Defender Firewall

After completing this module, students will be able to:

- Manage local accounts
- Configure UAC
- Implement BitLocker
- Describe Windows 11 security settings and features
- Describe common security threats and available mitigations

Module 9: Monitoring Windows 11

This module helps students identify performance-related problems with Windows 11 computers. Students also learn how to implement monitoring, including how to access and interpret event log data.

Lessons

- Monitoring Windows 11
- Optimizing Windows 11 performance

Lab 1: Monitoring Windows 11

- Working with events
- Reviewing performance using Resource Monitor
- Reviewing performance using Performance Monitor

After completing this module, students will be able to:

- Describe available monitoring options in Windows 11
- Describe how to identify performance problems
- Manage workloads and computer resources to optimize performance

Module 10: Troubleshooting Windows 11

This module explores how to troubleshoot issues related to hardware devices and device drivers. It also covers how to recover Windows 11 computers that won't start, or start with errors. Students also learn how to recover files.

Lessons

- Managing Windows 11 startup
- Recovering Windows 11
- Managing devices and drivers
- Understanding the registry
- Recovering files

Lab 1: Troubleshooting Windows 11

- Managing device drivers
- Using File History and Previous Versions to recover files
- Recovering a device with a restore point
- Using the advanced startup options

After completing this module, students will be able to:

- Explain how to recover Windows 11 computers
- Manage Windows startup
- Configure the registry
- Describe devices and device drivers
- Recover files
